INSTRUCTIONS FOR COMPLETING FEE PROCESSING FORM, FCC FORM 155, August 1991

- (1) "Applicant Name" Enter the name (last, first, middle initial) of the applicant as it appears on the original application or filing being submitted with this Fee Processing Form, If company, enter name which is used commercially.
- (2) "Mailing Address (Line 1)" Enter the street address or post office box number to which the applicant wishes correspondence sent.
- (3) "Mailing Address (Line 2)" This line may be used for further identification of the address if additional space is required.
- (4) "City" Enter the name of the city associated with the given street address.
- (5) "State or Country" Enter the appropriate two-digit state abbreviation as prescribed by the U.S. Postal Service. If address if foreign, enter the appropriate country name here.
- (6) "ZIP Code" Enter the appropriate five or nine-digit ZIP Code prescribed by the U.S. Postal Service.
- (7) "Call Sign or Other FCC Identifier" Enter the applicable call or unique FCC identifier, if any, as shown on your attached application or filing. If applying for a service affecting more than one call sign, enter one call sign only.
- (8) Column (A), "Fee Type Code" Enter correct Fee Type Code(s) from the appropriate Fee Filing Guide. Only one Fee Processing Form may be submitted per application or filing. Inaccurate or erroneous Fee Type Codes may result in your application or filing being returned to you without further processing.
- (9) Column (B), "Fee Multiple" Certain applications and filings may request action with respect to more than one station, license, frequency, or party and can be submitted together with one check if they meet specific conditions. This column is used only if a multiple, i.e., two or more, is being applied for. Examples of when this would be used are renewing more than one call sign, frequency, station, or the transfer of control of more than one station. Refer to the appropriate Fee Filing Guide for additional information.
- (10) Column (C), "Fee Due for Fee Type Code in Column (A)" Enter in this block the amount of the fee associated with the Fee Type Code shown in Column (A) (times (X) the fee multiple, if required).
- (11) "Total Amount Remitted With This Application or Filing" Enter the total of lines (1) through (5) of Column (C). This amount of your check or money order. We will not accept multiple checks.

HOW TO SUBMIT APPLICATIONS AND FILINGS

- o Each application or filing should be assembled with the Fee Processing Form, FCC Form 155, stapled to the top of the application with the check placed on top of the Fee Processing Form. DO NOT STAPLE THE CHECK TO THE APPLICATION OR FEE PROCESSING FORM, FCC FORM 155. Required copies of applications should be clearly identified as "duplicate copy" and placed behind the original package. "Stamp and receipt" copies should be placed on top of the original package and CLEARLY identified as return copies. Extraneous material and extra copies should be avoided at all times. Failure to follow these instructions will delay the processing of your submission.
- o Completed applications or filings should be mailed to the proper address shown in the Fee Filing Guide for the particular service for which you are applying or making a filing. All applications and filings must be properly addressed to the appropriate P.O. box number, even if hand delivered to the address listed below. Applications received before midnight on a normal business day will receive that day's date as the receipt date. Deliveries made after midnight on Fridays will not be "officially" receipted until the next Monday. Applications received on weekends and government holidays are dated the next regular business day.
- o A single check, bank draft or money order made payable to the Federal Communications Commission and denominated in U.S. dollars and drawn upon a U.S. financial institution must be included with each application or filing requiring a fee. No postdated, altered or third-party checks will be accepted. Do not send cash.
- o Parties hand delivering applications or filings may receive dated receipt copies by presenting copies of the applications or filings to the acceptance clerk at the time of delivery. Receipts will be provided for mail-in applications or filings if an extra copy of the application or filing is provided along with a self-addressed stamped envelope. Only one piece of paper per application or filing will be stamped for receipt purposes.

REMEMBER

- o A separate completed Fee Processing Form is required with each application or filing except in certain circumstances. Please refer to the appropriate Fee Filing Guide for additional information.
- o A wrong Fee Type Code or incorrect remittance may result in your application or filing being returned without processing, or result in the dismissal of your application or filing. Please ensure that FEE TYPE CODES are correct and that your check or money order equals the amount shown in the TOTAL AMOUNT REMITTED WITH THIS APPLICATION OR FILING block before submitting your application or filing.
- o If you have any questions completing this form, please call the Fees Hotline, 202/632-FEES.

FCC NOTICE FOR INDIVIDUALS REQUIRED BY THE PRIVACY ACT AND THE PAPERWORK REDUCTION ACT

Part 1. Subpart G of the Commission's rules authorize the FCC to request the information on this form. The information requested is required in order to obtain a license or authorization from the Commission. The purpose of the information is to provide a means to link a fee payment to a specific invoice, application or filing. The information will be used by the Commission to maintain data concerning fees paid to the Commission, for internal financial control, audit, and reporting purposes. Information requested on this form will be available to the public. Your response is required to obtain a license or other authorization from the Commission.

Public reporting burden for this collection of information is estimated to average 10 minutes per response, including the time for reviewing instructions, searching data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Federal Communications Commission, Office of Managing Director, Washington, DC 20554, and to the Office of Management and Budget, Paperwork Reduction Project (3060-0440), Washington, DC 20503.

ENGINEERING STATEMENT

I ABSTRACT

This engineering report supports the application of TODDJON requesting a construction permit authorizing the installation of a frequency modulated broadcasting station to serve Harrisburg, North Carolina.

This application proposes the employment of an omni-directional FM antenna with an effective radiated power of 6.0 kilowatts and a height of 100 meters above average terrain.

This engineering report complies in all respects with all pertinent sections of the FCC rules. All paragraphs answered fully on the attached Section V-B FCC Form 301 will not be repeated in the body of this engineering report.

II RESPONSE TO FCC FORM 301

Paragraph 8:

Exhibit I is a vertical plan sketch of the proposed antenna system.

III ALLOCATION CONSIDERATIONS

Paragraph 13:

The use of channel 224A at the proposed location would be fully consistent with all of the required separation criteria contained in Section §73.207 of the rules with respect to all existing and authorized stations or unused channel assignments. Attached as Exhibit II is a tabulation of an allocation study which demonstrates that the operation of channel 224A at the proposed site would not create any short spacing(s).

V FURTHER RESPONSE TO FCC FORM 301

Paragraph 14:

The distance to the proposed 115 dBu contour, as calculated in accordance with Section §73.318 of the rules, is 0.97 kilometers. There are no known commercial, government receiving stations, cable head-end facilities, or densely populated areas within 0.97 kilometers of the proposed site. There are, however, a limited number of residences within the "blanket contour". In the unlikely event objectionable interference is experienced, the applicant will, in accordance with Section §73.318 of the rules, apply all remedies necessary to satisfactorily resolve any complaints.

There are several FM and television broadcast transmitter sites, shown in Exhibits III(a) and III(b), which are located within 10 kilometers of the proposed site. Applicant accepts full responsibility, as required in FCC Form 301, for the elimination of any objectionable interference in the event such interference is experienced.

Paragraph 15:

Exhibit IV is a 1:1 scale copy of the original 7.5' U.S.G.S survey map and is furnished herewith to satisfy the requirements of this paragraph. The required latitude and longitude information as well as a scale of distance in kilometers is clearly shown.

Paragraphs 16:

The radials and predicted contours required by this paragraph are shown as Exhibit V and were predicted in accordance with Section §73.313 of the rules using a computer program that accesses a data base containing the pertinent FCC curves.

Paragraph 17:

The land area within the 1.0 mV/m contour was determined using a computer program which calculates the distances to the contour in 1 degree increments for 360° and integrates these measurements into the calculation of total area.

The population total within the 1.0 mV/m contour was computed using software that makes use of the official 1990 U.S. Bureau of Census data (post 7/15/91).

V FURTHER RESPONSE TO FCC FORM 301

Paragraph 17 - cont.:

This data is available in a data base as census "blocks" which are the smallest census entity having an average population per block of less than 50 persons. Associated with each census block is a set of reference coordinates as determined by the Census Bureau which is referred to as the "centroid". Where the "centroid" of a census block lies within the predicted 1 mV/m contour, the entire census block is included in the population total. Conversely, where the "centroid" is outside the contour, the entire census block is not included in the population total. Over large contours such as those predicted for WAMZ, the cumulative error of this method of population counting approaches zero.

Paragraph 20:

The proposed construction will have no significant impact on the quality of the human environment and any FCC action with regard to this application would be categorically exempt from environmental processing under Section §1.1306 of the rules. The proposed transmitter site does not fall into any of the categories specified in Section §1.1307(a) of the rules and the use of high intensity obstruction lighting is not contemplated.

The proposed radio facility will comply with the radio frequency protection guidelines contained in the ANSI C95.1-1982 standard (American National Standard Safety Levels With Respect to Human Exposure to Radio Frequency Electromagnetic Fields, 300 kHz to 100 GHz) with respect to all areas accessible to workers or the general public.

Calculations performed using the procedures found in OST Bulletin #65 ANSI guidelines were conducted to determine the height on the tower at which the ANSI maximum allowable radiation level of 1mW/cm² would be exceeded. These calculations show the maximum permissible radio frequency radiation produced by the proposed antenna occurs at a point 49.0 meters above the base of the tower. Calculations were also conducted to determine the level of radiation that would actually reach the ground in vicinity of the tower base. For the proposed antenna, the radiation level at ground level and for 2 meters above the ground would be 0.077 and 0.082 mW/cm², respectively. These radiation values are well below the ANSI maximum standard of 1 mW/cm².

VI STATEMENT WITH RESPECT TO EMERGENCY POWER

This application proposes the installation and maintenance of auxiliary power at the transmitter and studio location. The instant proposed equipment will be of sufficient capacity to power the transmitter and studio in the event of a power failure at one or both locations.

VII METHODS EMPLOYED

All data and computations contained herein or upon which this engineering report is based are in complete accord with the pertinent requirements of the FCC rules unless otherwise specifically so stated.
